

Green Family
THERAPIES

Green Family Therapies is proud to partner with United Christian Academy to provide speech and language screenings, assessments, and therapy to students in Kindergarten through High School.

Our team of highly-skilled and fully licensed Speech and Language Pathologists and Assistants are able to identify children who may benefit from intervention in the areas of speech-sound production, language development, social skills, and reading development. Students identified as needing supplemental support in the areas of speech and language are able to receive individual or group therapy during their school day at United Christian Academy, effectively saving families the need to schedule and transport their students to clinic-based therapy centers.

We believe our clients are best served when family, educational, and therapy professionals collaborate to create a comprehensive plan of action in the best interest of the child. Our therapists are able to work with school faculty to provide curriculum accommodations as well as recommendations and resources to support the development of students' speech and language skills in the classroom environment. As a part of the student's therapy program, parents receive weekly updates and opportunities for home-based practice. We are dedicated to being engaged participants in all aspects of your child's speech, language, and educational achievements.

For more information relating to our services and how we can help support your student, please contact Alexandria Green at (909) 333-6067 or alexandria@greenfamilytherapies.com.
